

Close the Digital Divide with BurlingtonEnglish

Digital literacy skills are essential as technology becomes more integrated into daily life

Most adults in the U.S. use computers every day on the job, yet **32 million** lack basic digital skills¹

73% of workers in the service sector don't have the skills to solve problems in digital environments²

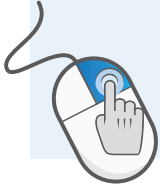

3/4 of all jobs within the next decade will require some form of technology skills³

BurlingtonEnglish helps develop English language proficiency while contextualizing digital literacy skills in one easy-to-use platform. From the time they log in, students are immersed in a complete digital environment that empowers them to become confident and competent digital citizens!

BurlingtonEnglish teaches:

Basic Computer Skills

Skills such as keyboarding, clicking, dragging, and using a mouse, taught through simple animated videos, to set the foundation for real-life application

Critical Thinking for Digital Applications

Critical thinking and problem-solving skills for a wide range of applications, including texting, emailing, reading online, and navigating websites

Digital Workplace Soft Skills

Essential digital skills to guide career planning, advance goal setting, and promote job success

Technical Skills for Career Advancements

Technical language and the digital skills needed to help students successfully transition into the workplace and advance in their careers
